

Federal Communications Commission
445 12th Street, SW
Washington, D.C. 20554
In the Matter of the Creation of a Low Power FM Service
MM Docket No. 99-25

September 13, 2011

Dear Commissioners:

The 1,675 letters included here in four separate attachments were collected through an e-action website administered by the Media and Democracy Coalition to enable public participation in the low power radio proceeding.

The letters, which are addressed from constituents to their elected officials in Congress as well as to the Federal Communications Commission, ask that channels be reserved for low power community radio in the home districts of their authors.

Sincerely,

Brandy Doyle
Policy Director
Prometheus Radio Project
(a member organization of the Media and Democracy Coalition)
P.O. Box 42158
Philadelphia, PA

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

William Creeley
615 Miller Street
Philadelphia, PA 19125

Sincerely,

Larry Best
855 17th Street
Rock Island, IL 61201-2561

Honorable Congress person and FCC Commissioners,

I am so grateful that Congress passed the bipartisan Local Community Radio Act last year. I know it has come about largely as the result of a ten year campaign led by a coalition of grassroots organizations, churches, schools, and non-profit organizations. With the mandate that this law gives to the FCC to expand low power FM (LPFM) radio and ensure that there are channels available for new low power stations, I am hopeful that my community in Hays County, Texas will be able to secure a LPFM station.

In order for the law to be implemented in a way that will benefit communities, the FCC first needs to resolve a backlog of pending applications for translators, which repeat the signals of other FM stations. While I recognize that translators can be of benefit to communities if they have no better alternative, I believe that having a community-centered radio station will be far more beneficial. I ask the FCC and Congress to give preferential treatment to community-based radio stations.

Local radio stations are far preferable to translators because they provide important emergency information for local communities, information about issues of local importance, and help connect a community in important ways. Until you have lived in a community and county with no local radio or television station, you may not realize just how much you are missing. I do, and I have.

Twice now our water supply was cut off. It occurred after the close of business and there was no way to get information about what had occurred and when we might anticipate repairs to be completed. We needed to be able to plan for water to cook, drink, and use to bathe, but we were unable to find out anything. Luckily after several hours water was restored.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators. There's no comparison between the two options really.

Community radio is tremendously important as a resource for sharing information, providing needed information during emergencies, celebrating our community and culture, and building community ties. Please urge the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Susan Raybuck

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

I believe that since there is a limited amount of radio airplay in this area, we would benefit from a LPFM Station to present Art, Music, Education, Community Affairs, The Wonderful Activities for the Highland Area, and of course the diversity in music and theater here. There is just not any diversity as in urban areas that would give a different point of view. I am certain there would be many people to gladly become involved in such a project to stream the area with a great mass of information to maybe be a different perspective motivate people in this area, to maybe inform them more and provide an educational experience outlet that could be a positive change in the lives of some individuals that need a uplift in their spirits and hope for their daily lives and future. I am not talking about business as usual, but allowing everyone to become involved as a community and provide a true democratic view of opinions across the board.

Diversity is needed in our country and the bickering needs to stop. We must come together and get back to community, the golden rule, and helping and sharing in each others lives. Our state needs this more than most in many I have visited. Such an endeavor could be something if provides a great experience in the lives of the people of this small region could be something that maybe in the future be an incentive to stream throughout the state. I hope you all consider such an endeavor a positive move in creating a positive movement in for us all. Everyone, including you all, should have a input on such fun project for the people of this state. Thank you for listening and I hope you think that this can be a benefit, maybe of small cost with large benefits and pay offs for the people of the state. I sincerely appreciate it personally.

Sincerely,
Ralph G. Adkisson

Elkins, WV 26241

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,
mahamed cali

In Takoma Park we are especially in need of access to "hyper-local" radio. We are a very diverse community, and the radio of the DC metropolitan area does not begin to address the needs of the many cultures who thrive in our small town.

Please support the creation of LPFM, and vote against the translators. We need more local everything, including food and RADIO.

Sincerely,
Marika Partridge

Belgrade Lakes, ME 04918

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Fred Schwacke
POB 367

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Donna Dale

This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

armando couto

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Helen Borland
205 Spring Ridge Drive
Roswell, GA 30076-2605

Honorable Rep Kankford, Senator Inhofe, Senator Coburn and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations. Many translator permits have been issued to churches that only take the permits and resell them for cash. I personally would like to spearhead a community radio station for Shawnee, Oklahoma that would allow local residents to produce a radio show. I do believe that this is what radio is all about. Not the irresponsible practices of companies like Clear Channel and Cumulus that have no interest in the communities they are in other than to collect as much money as possible but do very little to support their communities. I would like to give our community it's own voice free of corporate agendas and profit margins.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state. We also need the FCC to be responsible in fees when it comes to this process. In today's economy it will take non-profits and persons interested in doing this enough money to meet the technical expectations of the commission. We beg to have these permits made available in a responsible manner. I respect the commission and the difficult position they are in, but the last set of translator permits that were made available was a total sham. Many legit broadcasters that needed an FM translator for a struggling daytime only AM station were forced to buy existing permits from these so called churches at very expensive prices.

Sincerely,

Chris Torrick

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Preston Rhea
311 Claremont Dr.
Gadsden, AL 35901

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,
Breanna Byington

Sincerely,

John McGarry
198 Carpenter St
Providence, RI 02903

Honorable Congress person and FCC Commissioners,

As a constituent, please allow me to rise in support of the public interest and urge you to support the implementation of the Local Community Radio Act.

As you may know, in order to preserve channels for the expansion of low power FM (LPFM) radio as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

We need your assistance and ask you to please compel the FCC to set the rules to preserve channels for LPFM community radio in our district and our state. Community radio is a vital resource for discussion of local issues and news, cultural enhancement, information sharing, and emergency communications.

Sincerely,

Barry Dredze
0s311 Park Street

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Robert Currall
27100 Manzanita Ct
Pioneer, CA 95666

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Jan Schneider

We are especially eager to create a new LPFM station in Walnut Creek, as this thriving edge-city has no local media of it's own, only poor reception from across the mountains in San Francisco and Sacramento.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Honorable Congress person and FCC Commissioners,

If the purpose of the act is to offer local community radio, whether an ethnic community for a native language and culture broadcast, school programming, religious events, then do so. To allow major translators and other commercial outfits to wholly hog what slivers remain across the spectrum is wrong. Leave us the gleanings, please.

Dear Senator Alexander, Senator Corker, Representative Blackburn and FCC Commissioners,

I have spoken to each of you over the years regarding my strong support for an LPFM station for Germantown, TN. The idea of establishing an LPFM channel has wide-reaching support in our community.

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. In our city of Germantown, TN, we plan to place our station in the local high school. It will be used for educational programming and will equally be used as a community resource by local groups like the Rotary Club and other such institutions. Since we do not have a commercial Germantown radio station, our LPFM channel will serve our community in the event of natural disasters.

Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

E. Frank Bluestein
efbluestein@gmail.com

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Jessica Stelzer

I can remember when radio was largely a local phenomenon, when broadcasts originated from Knoxville with local personalities at the mike, addressing local concerns, local tastes and local contributions. We could phone our station to ask what number was playing or to request a particular piece for ourselves or a loved one. We could report important events and get local warnings of looming emergencies. That is all but lost now; our local "public" radio station is barely more local than the blandest voice-tracking station. Please help to make REAL community radio available once more.

Yours truly,

John Mayer

This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

James Wittebols
444 W. Willis St.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state/county/town!

Last night I attended the Round Lake Illinois, WRLR Geo Awards Dinner. This is a great example of the little station that could. It has had a tough time but now has 40 different programs and operates 24/7. It is a vital community asset.

This is the kind of station I would like to see in my community (Marengo, Illinois). We have lost the ability to stay connected with local information, happenings and news. A community radio station could provide this link. Without the license availability we will remain unconnected.

Sincerely,

Steve Sandman

Burlington, VT 05401

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,
Kathleen A. Beltaire
741 Seyburn St.
Detroit, MI 48214

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Dewey Fish
206 Apollo Street
Gretna, LA 70056-2611

Honorable Congress person and FCC Commissioners,

I'm interested in empowering community members to have a voice about local events and issues, for example the unfortunate storm hitting our communities right now. I think entrusting communities to speak on local airwaves about what's affecting them can only be a benefit.

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

roberto otero

and
To: FCC Commissioners

As a resident of the rural coast of Oregon, I can tell you that it is vital that the FCC set rules that preserve channels for low power community radio in our district/state.

This past March, and despite tsunami warnings beginning shortly after midnight (PDT), it was nearly 5 hours later before our local, COMMERCIAL, station chose to go on air w/ tsunami warnings and evacuation instructions.

I believe the message is clear. It is imperative that the FCC preserve channels for low-power community radio!

FYI, Lea Patten, Florence

In

Sincerely,

Lea Patten
04699 N. Jetty Rd
Florence, OR 97439-9036

Honorable Congress person and FCC Commissioners,

I am writing as a volunteer with WXPI 88.5 Williamsport Community Radio in rural, north-central Pennsylvania. We are a new full-power station working to bring more diversity and localism to our local radio scene. But many communities in our region have no such local voice on the airwaves and are hoping they will be able to apply for new low power stations. We need truly local radio, not more translators of giant radio conglomerates!

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Robert Ebright

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Nadav Carmel
